

# IST 687 Team#5 Update 1{Jordan Epstein, Thomas Lento, Vic Millar, Cheromaine Smith}

## Accomplished this past period

1. Selected a dataset - Amazon Sales
2. Decided on a plan to come up with 3 business questions per team member
3. Imported data set into Rstudio

## What is Working Well

1. The communication between team members.
2. Were able to agree on an appropriate set of data that is both interesting and useful.
3. Overall cohesive movement towards end goal.

## Plans for next update

1. Cleaning and Transforming the dataset.
2. Analyzing the datasets (Descriptive Statistics, Summary, Visualizations)
3. Narrow down what 10 business questions we would like to answer with this dataset.

## Issues/Not working well

1. We went through multiple datasets; trying to fit the criterias we put forth
2. Scheduling zoom meetings as we all have very different schedules.
3. Difficulty using new project management software.

# IST 687 Team#5 Update 2{Jordan Epstein, Thomas Lento, Vic Millar, Cheromaine Smith}

## Accomplished this past period

1. Cleaning and Transforming the dataset.
2. Begun analyzing the datasets (Descriptive Statistics, Summary, Visualizations)
3. Narrowed down what 12 business questions we would like to answer with this dataset.

## What is Working Well

1. The communication between team members.
2. We decided what visualization we want to showcase quickly.
3. Overall cohesive movement towards end goal.

## Plans for next update

1. Translate the discounted and actual price fields to US dollars and remove the symbols.
2. Complete the visualizations
3. Small data NA cleanup
4. Split our category column into different datasets.

## Issues/Not working well

1. Removing a symbol in front of the prices is giving us difficulty.
2. We have 12 business questions, so we need to cut down on a few.
3. Finding times where everyone can meet is almost impossible.
